

Multidisciplinary research opportunities at Iowa State University exist through the various centers on campus which include:

Bioeconomy Institute <http://www.biorenew.iastate.edu/>

Plant Sciences Institute <http://www.plantsciences.iastate.edu/>

Center for Crops Utilization Research (CCUR) <http://www.ag.iastate.edu/centers/ccur/>

New Century Farm <http://www.extension.iastate.edu/Bioeconomy/NewCenturyFarm>

NIEHS Center for Research on Dietary Botanical Supplements <http://www.nwrc.iastate.edu/>

Office of Biotechnology Fermentation Facility
http://www.biotech.iastate.edu/service_facilities/fermentation.html

Industrial & Food Microbiology: Start-up funds for research are available and additional start-up funds may be available from the Office of Biotechnology. Facilities available include substantial biobased products/food processing laboratories, fermentation equipment at bench to pilot scale, a high throughput microbial and chemical analysis laboratory, and core campus facilities for biological, engineering and chemical preparation and analysis. CCUR also has multiple state-of-the-art processing pilot plants.
